Truck Make

Truck Model

Model Year (2001-2007?)

Milage / Hours Running

GWV (more than 33,000, tag on drivers door frame)

Transmission model number
(Tag on right rear side of transmission)

The model number should start with a 3 and end
with a P (Ex. 3060P)

Transmission serial number

Wheel Base (212 is ideal)

Rear End Ratio (6.5-5.3)

Length of frame from the cab to the end (235" or more)

- Look for a PTO that is installed when you know it is PTO ready
- To be safe call into an Allison dealer with the number to confirm it is PTO ready
- Ask the salesman about how the emissions are handled. If it has a regenerative system it may create too much heat to use on the farm.
